

## Custom Career Gateway Elective Track Approval Form

Name: \_\_\_\_\_

UT EID: \_\_\_\_\_

The mechanical engineering curriculum includes twelve hours of career gateway electives. Students on the 18-20 catalog and beyond are required to choose from a list of tracks and complete the courses included in the track. However, in some circumstances, students educational and career interests will fall outside of the available tracks. In this case, students have the ability to choose courses to create a custom track. These courses should be chosen carefully and must be pertinent to each other and to the student's career goals.

**Before registering for any career gateway elective courses**, students must complete and submit this form to the undergraduate faculty advisor along with a 1-page, single-spaced, typed document that explains how each of the courses selected will provide them with a solid preparation for their career and educational goals.

Please list the courses you wish to apply toward your Career Gateway Electives in the chart below. **Courses MUST be in-residence, upper-division, and taken for a letter grade. Additionally, as of March 2022, at least two courses must be technical courses (i.e. any engineering discipline, AST, BIO, BCH, CH, CS, GEO, M, NEU, or PHY).**
